

**PRESS RELEASE  
FOR IMMEDIATE PUBLICATION**

## **NEW STRATOS: MANUFACTURING OF A LIMITED SERIES**

Torino, February 5th, 2018

Manifattura Automobili Torino and New Stratos GbR have reached an agreement for the manufacturing of a limited series of the New Stratos.

The car developed by Michael Stoschek, Chairman of the Brose Group and famous German Entrepreneur, together with his son, and originally built by Pininfarina, has been licensed to MAT that will produce and sell a maximum of 25 units.

Paolo Garella, presently CEO of Manifattura Automobili Torino and former Program Manager of the New Stratos Project, has obtained from Michael and Maximilian Stoschek permission to replicate the New Stratos using the same design and technologies of their car.

The 25 units will be offered worldwide, with the customer having a choice of different options and variations. The base platform that MAT will use to build the New Stratos will allow the creation of a GT racer, a Safari version, but also a competent supercar for the daily use.

The striking design of the New Stratos follows the lines of its world-famous predecessor offering a new exciting interpretation of the most famous and successful rally car of the past. Its lightweight design, the engine that can deliver over 550HP and the specially tuned suspensions and the ideal balance deliver an experience that no other supercar can assure on tight and twisty roads. The classic and simple car interior is a perfect example of efficient and bespoke design. It maintains the characteristics of the original car, like the integrated support for the helmets in the doors and enhances the souls and the mission of the car: making it ready to be a new, winning rally car.

Michael Stoschek has commented on the agreement by saying: "I am delighted that other passionate car enthusiasts can experience how successor of the most fascinating rally car from the seventies still sets the bar for design and performance today".

Paolo Garella added: "For MAT this agreement is a further step in our growth and allows our path to becoming a true manufacturer. A small production run is a new challenge for us. To have the opportunity to build the New Stratos is a great honor and a recognition of the capabilities that MAT has acquired over the last few years. From its foundation in 2014, MAT has been involved in 4 different projects for the design and development of supercars. Now with the New Stratos we will deliver an extremely refined supercar that can be used every day but also deliver excitement and exhilarating fun on twisty roads."

The car in all its variants will be presented at the upcoming Geneva Motorshow at the MAT stand. Prices and terms of delivery will be announced during the event.
